

EVERYONE CAN wash hands, bathe, and shower with unfiltered water

DO USE an NSF-certified water filter rated to remove lead

DO RUN cold water throughout the house for 2 to 5 minutes every morning to flush pipes in order for phosphate to help recoat the lead pipes.

Regularly inspect and clean aerators and filters on faucets: Trapped debris can be a source of lead or other contaminants. Remove and inspect the aerator (or filter) on the end of the faucet and remove any debris such as metal particles. Guidance on cleaning aerators is enclosed.

Purchase lead-free faucets and plumbing components: EPA has developed the enclosed fact sheet to assist homeowners with selecting lead-free plumbing materials.
